

BEST POSITION FOR THE DUPLICATION

IT IS RECOMMENDED:

TO REALIZE A CORRECT DUPLICATION OF THE REMOTE CONTROLS, WE RECOMMEND TO FOLLOW THE PROCEDURES HERE BELOW TAKING CARE TO DISTANCE YOURSELF BY TOOL THAT CAN GENERATE FREQUENCY TROUBLES AS:

- CORDLESS
- WI-FI VIDEO SURVEILLANCE DEVICES
- MOBILE PHONES, SMARTPHONES OR TABLETS
- WI-FI OR BLUETOOTH ACTIVATED IN YOUR COMPUTERS
- ELECTRONIC MOTOR
- NEON LIGHTS
- WIRELESS DEVICES FOR BACK END MANAGEMENT IN THE BUSINESS STORES

1. While pressing the button 1 of the "WHY EVO", at the same time press 4 times button 2.
2. Release both buttons. Now the WHY EVO WHITE LED emits a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the "WHY EVO", at about 5 cm of distance (as shown in the picture).
4. Press and retain pressed the button of the original remote control and wait for a change flash (as a faster flash) of WHY EVO WHITE LED and a change of its color (BLUE) that confirms the correct learning of code. This step may take a few seconds and during that the color LED is WHITE.
5. While the BLUE LED is flashing, press the button of the "WHY EVO" where you want to program the code just learnt, and retain pressed until the LED switches off and an extended sound "BEEP" for a reconfirmation of the correct code learning. This step may take some seconds.
6. The copy has been successful. Now test the WHY EVO to ensure it is functioning correctly.

Notes:

- If the WHITE LED flashes only 3 times (of WHITE color) and switches off, the code has not learnt correctly. Please repeat the operation from the step 1.
- The WHY EVO memory is completely re-writable.
- To duplicate further buttons of WHY EVO, please repeat the operation from the step 1.

ROLLING SIMPLE

DUPLICATING PROCEDURES

1. While pressing the button 1 of the “WHY EVO”, at the same time press 4 times button 2.
2. Release both buttons. Now the WHY EVO WHITE LED will emit a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the “WHY EVO”, at about 5 cm of distance (as shown in the picture).
4. Press and retain pressed the button of the original remote control and wait for a change flash (as a faster flash) of WHY EVO WHITE LED and a change of its color (BLUE) that confirms the correct learning of code. This step may take a few seconds and during that the color LED is WHITE.
5. While the BLUE LED is flashing, press the button of the “WHY EVO” where you want to program the code just learnt, and retain pressed until the LED will switch off. The WHY EVO remote control will emit an extended sound “BEEP” for a reconfirmation of the correct code learning.
6. The copy has been successful.
7. Now activate the correct procedure for the programmed model and insert the new remote control on the receiver (see the compatibility list present in this manual).

Notes:

- If the WHITE LED flashes only 3 times (of WHITE color) and switches off, the code has not learnt correctly. Please repeat the operation from the step 1.
- The WHY EVO memory is completely re-writable.
- To duplicate further buttons of WHY EVO, please repeat the operation from the step 1.

To activate the remote control on the receiver for models marked with  proceed as below:

1. First of all you must be closed to the automation.
2. Press and retain pressed the programmed button during 10 seconds, when the LED start to flash, release the button.
3. Wait until the LED will turn off. The operation has been done, now you can use your new remote control.

To activate on the receiver all the other models: Refer you to the instructions of the original model.

NOTE: THE SEED CODE OF THE WHY EVO CAN BE EMITTED AS HERE BELOW:

- 1. Press the buttons 1 and 2 simultaneously for 8 seconds and release them when the LED start to flash;**
- 2. While the LED is flashing press the button with the seed code needed.**

ATTENTION!! Every kind of receiver can have the “radio-mode” disarmed. In this cases will be necessary insert the new remotes controls with the “manual procedures”.

ROLLING COMPLEX

DUPLICATING PROCEDURES

BFT 

1. While pressing the button 1 of the “WHY EVO”, at the same time press 4 times the 2 button.
2. Release both buttons. Now the WHY EVO WHITE LED will emit a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the “WHY EVO”, at about 5 cm of distance (as shown in the picture).
4. Press and retain pressed the button to be programmed of the original remote control, till the WHITE LED will switch on as a fix light; now release the button.
5. The WHY EVO WHITE LED will emit a short flash every 2 seconds supported by two following sound “BEEP”. These two alerts inform the user that, to duplicate the remote control, it is necessary to emit the SEED CODE to realize the copy.
6. Transmit now the SEED CODE of the BFT original remote control, using a pin, press the rear hide button (see the picture) or, according to the new references, press the 1 and 2 buttons until the original remote control LED switches on. (see the picture)
7. Now the WHY EVO WHITE LED will change the flash mode (faster) and color (BLUE), for a reconfirmation of the correct code learning. This step may take some seconds.
8. At this moment, press the WHY EVO button when you want to store the code and retain pressed until the WHY EVO BLUE LED switches off and an extended sound “BEEP” is emitted for a reconfirmation of the correct code learning.
9. Activate now the  procedure to insert the new remote control on the receiver.

V2 
433 - 868

1. While pressing the button 1 of the “WHY EVO”, at the same time press 4 times the 2 button.
2. Release both buttons. Now the WHY EVO WHITE LED will emit a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the “WHY EVO”, at about 5 cm of distance (as shown in the picture).
4. Press and retain pressed the button to be programmed of the original remote control, till the WHITE LED will switch on as a fix light; now release the button.
5. The WHY EVO WHITE LED will emit a short flash every 2 seconds supported by two following sound “BEEP”. These two alerts inform the user that, to duplicate the remote control, it is necessary to emit the SEED CODE to realize the copy.
6. Transmit now the SEED CODE of the V2 original remote control pressing at the same time 1 and 2 buttons.
7. Now the WHY EVO WHITE LED will change the flash mode (more fast) and color (BLUE), for a reconfirmation of the correct code learning. This step may take some seconds.
8. At this moment, press the WHY EVO button when you want to store the code and retain pressed until the WHY EVO BLUE LED switches off and an extended sound “BEEP” is emitted for a reconfirmation of the correct code learning.
9. Activate now the  procedure to insert the new remote control on the receiver.

To activate the remote control on the receiver for models marked with  proceed as below:

1. First of all you must be closed to the automation.
2. Press and retain pressed the programmed button during 10 seconds, when the LED start to flash, release the button.
3. Wait until the LED will turn off. The operation has been done, now you can use your new remote control.

To activate on the receiver all the other models: Referyou to the instructions of the original model.

NOTE: THE SEED CODE OF THE WHY EVO CAN BE EMITTED AS HERE BELOW:

1. Press the buttons 1 and 2 simultaneously for 8 seconds and release them when the LED start to flash;
2. While the LED is flashing press the button with the seed code needed.

ATTENTION!! Every kind of receiver can have the “radio-mode” disarmed. In this cases will be necessary insert the new remotes controls with the “manual procedures”.

FAAC 
433 - 868

GENIUS 
433 - 868

Attention: verify the programming remote control is a MASTER.

Pressing whatever button, the LED has to emit a double flash rather than to switch on as a fixed light.

1. While pressing the button 1 of the "WHY EVO", at the same time press 4 times the 2 button.
2. Release both buttons. Now the WHY EVO WHITE LED will emit a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the "WHY EVO", at about 5 cm of distance.
4. Press and retain pressed the button to be programmed of the original remote control, till the WHITE LED will switch on as a fix light; now release the button.
5. The WHY EVO WHITE LED will emit a short flash every 2 seconds supported by two following sound "BEEP". These two alerts inform the user that, to duplicate the remote control, it is necessary to emit the SEED CODE to realize the copy.
6. Predispose the FAAC/GENIUS remote control for the SEED CODE emission. Press at the same time the 1 and 2 buttons (note: THESE ARE THE BUTTONS OF THE DIAGONAL LINE as in the picture).

7. While FAAC/GENIUS remote control LED flashes, place it in front of WHY EVO at a distance of 5cm and press the button to be programmed until the WHY EVO WHITE LED will change the flash mode (more fast) and color (BLUE), for a reconfirmation of the correct code learning. This step may take some seconds.
8. At this moment, press the button when you want to store the code and retain pressed until the WHY EVO BLUE LED, switches off and an extended sound "BEEP" is emitted to confirm the correct learning of the code.
9. The copy has been happened with success. Now check on the automation the correct functioning of new WHY EVO remote control pressing two times the copied button.

Notes:

- If the WHITE LED flashes only 3 times (of WHITE color) and switches off, the code has not learnt correctly. Please repeat the operation from the step 1.
- The WHY EVO memory is completely re-writable.
- To duplicate further buttons of WHY EVO, please repeat the operation from the step 1.

1. While pressing the button 1 of the “NEW WHY EVO”, at the same time press 4 times the 2 button.
2. Release both buttons. Now the WHITE LED of “NEW WHY EVO” will emit a short flash every 2 seconds.
3. Place the “SOURCE WHY EVO” in front of the “NEW WHY EVO”, at about 5 cm of distance (as in the picture 3 at the page 3).
4. Press and retain pressed the button to be programmed of the “SOURCE WHY EVO”

NOW IF THE CODE IN THE “SOURCE WHY EVO”

IS A FIXED OR ROLLING-SIMPLE CODE

5a wait for a change flash (as a faster flash) of “NEW WHY EVO” WHITE LED and a change of its color (BLUE) that confirms the correct learning of code. This operation may take some seconds.

6a While the BLUE LED is flashing, press the button of the “NEW WHY EVO” where you want to program the code just learnt, and retain pressed until the LED will switch off and an extended sound “BEEP” is emitted for a reconfirmation of the correct code learning.

7a The copy has been happened with success. Now check on the automation the correct functioning of NEW WHY EVO remote control pressing directly the button where the code has been programmed. If it will not work, please proceed with the insertion on the receiver of the NEW WHY EVO, through the  function, if it is present, or through the procedures given by the automation manufacturer.

IS A ROLLING-COMPLEX CODE

5b The WHY EVO WHITE LED will emit a short flash every 2 seconds supported by two following sound “BEEP”. These two alerts inform the user that, to duplicate the remote control, it is necessary to emit the SEED CODE to realize the copy.

6b Transmit now the SEED CODE of the “SOURCE WHY EVO” pressing at the same time 1 and 2 buttons for 3 seconds till the switch on of WHITE LED. While the LED is flashing, (within 10 seconds) pressing and retain pressed the button where you want to program the SEED CODE.

7b Now the WHITE LED of the “NEW WHY EVO” will change the flash (more fast) and color (BLUE) to confirm the correct learning of the code. This step may take some seconds.

8b At this moment, press the NEW WHY EVO button when you want to store the code and retain pressed until the WHY EVO BLUE LED, switches off and an extended sound “BEEP” is emitted to confirm the correct learning of the code.

9b The copy has been happened with success. Now check on the automation the correct functioning of NEW WHY EVO remote control pressing directly the button where the code has been programmed. If it will not work, please proceed with the insertion on the receiver of the NEWWHYEVO, through the  function, if it is present, or through the procedures given by the automation manufacturer.

Notes:

- If the WHITE LED flashes only 3 times (of WHITE color) and switches off, the code has not learnt correctly. Please repeat the operation from the step 1.
- The WHY EVO memory is completely re-writable.
- To duplicate further buttons of WHY EVO, please repeat the operation from the step 1.

SPECIAL PROCEDURES

TO REACTIVATE THE ROLLING SICE TECH CODE INSERTED AS DEFAULT ON A BUTTON, PROCEED AS HERE BELOW:

1. While pressing the button 1 of the WHY EVO, at the same time press 4 times button 2.
2. Release both buttons. Now the WHITE LED "WHY EVO" will emit a short flash every 2 seconds.
3. Press the button where you want to reactivate the rolling code and retain pressed till the WHITE LED will become BLUE and then it switches off. At this moment, an extended sound "BEEP" will be emitted to confirm the correct reactivation.

NOTES:

TO reactivate further buttons of WHY EVO, please repeat the operation form the step 1.

TO MAINTAIN THE SAME SERIAL NUMBER ON ALL 4 BUTTONS

1. While pressing the button 1 of the WHY EVO, at the same time press 4 times button 2.
2. Release both buttons. Now the WHITE LED "WHY EVO" will emit a short flash every 2 seconds.
3. Place the original remote control to be programmed in front of the "WHY EVO", at about 5 cm of distance (as shown in the picture at the page 3).
4. Press and retain pressed the 1 button of the original remote control and wait for a change of color (BLUE) of "WHY EVO" WHITE LED that it will switch off and it emit an extended sound "BEEP" to confirm the correct learning code. This step may take some seconds.
5. The copy has been successful.
6. Now activate the correct procedure for the copied model and insert the new remote control on the receiver (see the compatibility list present in this manual).
